27-36 : For these questions, choose the best option to complete the given sentence.

Human eyes might miss subtle shifts in a river's colours holding clues to what flows in its water ----.

- (A) while satellites can detect them and researchers can use them to track large-scale changes and potentially spot signs of trouble
- (B) supposing that colours of rivers can range from warm yellows and brown to cool greens and blues, a range of shades appearing to the human eye
- (C) even though regional factors such as land-use patterns and watershed-management practices influence long-term river hue shift
- (D) so that many of the world's rivers turn more yellow in spring or summer as high rainfall muddies the waters
- (E) as the fact that river colours in western US mostly transcend toward the blue end of the spectrum over time suggests that they carry less sand and silt

63-67 : For these questions, choose the best option to complete the dialogue.

Jay:

- Well then, tell me... What are your New Year's resolutions?

resolve:decide karar vermek / solve

Meredith:

- I don't want anything as long as I get to keep all that I own right now.

karar / resolute: kararli irreasolutely kararsiz sekilde

Jay:

- That's very modest of you. Wouldn't it be nice to have a new car, more money and a bigger house in the new year?

Meredith:

Jay:

- I believe we need more people like you who aren't dazzled by material things. How different everything would be then!

(A)

Now that you mention it, I wouldn't say "no" to a new car. My current one has been giving me trouble for a while!

(B)

Not really. I'm content with what I have. Why would I even ask for more when I have enough?

pleased /satisfied memnun happy

I am like anyone else

(C)

Perhaps you're right. We tend to want more as we start earning more money in life, and I'm no exception.

(D)

Well, that's an idea! In fact, I would like to travel more, experience new faraway places and get stuff that we can't find at home.

(E)

Maybe I could adjust my spending habits this year and use my money on more useful items than before.

68-71 : For these questions, choose the best rephrased form of the given sentence.

If without sufficient sleep in the week before having an annual flu shot, the individual may produce less than 50 per cent of the required antibody response, rendering the vaccination far less effective.

KILAR: MAKE

- (A) If a person has inadequate sleep in a week before getting a yearly flu shot, the vaccination will lose its effectiveness as the expected antibody response the individual would produce will decrease by 50 per cent.
- (B) Inadequate sleep, even for a week, may cause a person to produce 50 per cent less antibody response a yearly flu shot normally elicits and this may diminish the effect of the vaccination on the individual.
- (C) If a person has not slept adequately for a week before receiving a yearly flu shot, it is possible for the individual to produce less than 50 per cent of the necessary antibody response, which may make the vaccination a lot less effective.
- (D) It is highly likely for a person to produce 50 per cent less antibodies when the individual has not had enough sleep more than a week before receiving the yearly flu shot and this will, in turn, reduce the efficiency of the vaccination.
- (E) It is important for a person to have enough sleep in a week prior to receiving a yearly flu shot; otherwise, the vaccine may prove useless to a great extent as the necessary antibody response produced by the individual may be less than 50 per cent.

72-75 : For these questions, choose the best option to complete the missing part of the passage.

Protein is essential for building muscle mass. Whey protein is the most commonly used protein supplement among bodybuilders because it is absorbed and metabolised by the body at fast rates. --- While these are usually powdered drinks mixed with milk, juice, or water, sometimes they come in bar form. These substances are generally low in fat, have a modest amount of carbohydrates, include vitamins and minerals, and, most importantly, are high in protein. Many bodybuilders also use thermogenics, another form of dietary supplement. Thermogenics increase metabolism through heat generation, resulting in the loss of fat.

- (A) Bodybuilders need to maintain a low bodybuilding percentage of body fat and a high percentage of muscle to obtain the desired physical appearance.
- (B) Many bodybuilders consume meal replacement products (MRPs) which provide the calories and nutrients that would generally be consumed in a meal.
- (C) Because bodybuilders exert large amounts of energy, they generally require between 500 and 1,000 more calories per day than the average person.
- (D) Bodybuilders, as well as other athletes, tend to use dieting to achieve the body type that will help them be effective competitors in their sport.
- (E) The overall goal of these complex eating habits is to alter the body and improve physical and mental well-being.

76-80 : For these questions, choose the irrelevant sentence in the passage.

(I) Antibiotics work by eliminating bacteria or by preventing them from multiplying. (II) Sometimes, however, not all the bacteria are eliminated completely; instead they survive despite the antibiotics and the bacteria that survive are said to have a resistance to the antibiotic. (III) As those bacteria multiply, they pass on the resistance to new bacteria and the next time those bacteria are exposed to the same antibiotic, even fewer of them die. (IV) Eventually the antibiotic does not kill enough of the bacteria to make the illness go away and when enough types of bacteria become resistant to an antibiotic, doctors no longer use that antibiotic as a medicine. (V) Antibiotics do not work against common colds or other illnesses caused by a virus.

- (A) I +
(B) II -
(C) III -
(D) IV ✓
(E) V ✓
