31.

27-36 : For these questions, choose the best option to complete the given sentence.

Because hackers constantly improve at penetrating cyber defences to steal valuable documents, ----.

- (A) they generally invite other hackers to get into systems to demonstrate their exceptional merits and successes
- (B) researchers propose using an artificial-intelligence algorithm to confuse them by hiding the real information among the fakes
- (C) they often extend their zealous explorative tendencies to others' computers, breaking into networks and corporate computers
- (D) electronic theft involves them using Internet banking connections to make money transfers from legitimate accounts to bogus accounts
- (E) it is debatable that some hacking activity can be justified in terms of its social benefits, at least when it results in no harm to innocent people

40.

37-42 : For these questions, choose the most accurate Turkish translation of the sentences in English, and the most accurate English translation of the sentences in Turkish.

Bedenimiz ve duygularımız arasındaki bağlantıya dair farkındalığın ortaya çıkışı, Amerikalı düşünür William James'in mutlu olduğumuz için gülmediğimizi, aksine güldüğümüz için mutlu olduğumuzu ileri sürdüğü 19. yüzyıla dayanır.

- (A) The emergence of the awareness of a link between our body and our emotions goes back to the 19th century, when the American philosopher William James suggested that we do not laugh because we are happy, rather we are happy because we laugh.
- (B) In the 19th century, the American philosopher William James claimed that we do not laugh because we are happy, rather we are happy because we laugh, which led to the emergence of the awareness of a link between our body and our emotions.
- (C) The emergence of the awareness of a link between our body and our emotions, which was thanks to the American philosopher William James suggesting that we do not laugh because we are happy, rather we are happy because we laugh, dates back to the 19th century.
- (D) The suggestion of the American philosopher William James that we do not laugh because we are happy, rather we are happy because we laugh raised an awareness of a link between our body and our emotions in the 19th century.
- (E) The link between our body and our emotions led to the emergence of an awareness dating back to the 19th century, when the American philosopher William James suggested that we do not laugh because we are happy, rather we are happy because we laugh.

65.

63-67 : For these questions, choose the best option to complete the dialogue.

Margaret:

– **George, isn't cartoon the same as animation? Why are they used as different concepts in my coursebook?**

George:

– **Well, technically speaking, animation is defined as a production technique that uses cartoon-like figures to create the illusion of movement via the use of sequences of cartoons, drawings, graphics, and models to simulate real-life characters in apparent motion.**

Margaret:

– **I see. Do you happen to know anything about the origin of animation?**

George:

– **It began with thumbing a series of pages or the corners of cards, and then artists developed the first animated movies using drawings on transparent celluloid sheets.**

Margaret:

– ----

George:

– **That's due to the application of another technique which involves the creation of 3-D figures that are posed and photographed for hundreds of thousands of times to finally make them look like a film.**

- A So, why do some of them seem to be actual things rather than cartoon figures?
- B Do you think they can move or talk and adaptively interact with the audience?
- C What about computer-made animations? Do they also use the same technique?
- D What are the techniques of creating an active background while producing animations?
- E Could you also explain about the reason why children like animations having dolls more than painted ones?

68.

68-71 : For these questions, choose the best rephrased form of the given sentence.

Tapping the ocean for its valuable properties is a slow process, not just because of the nature of the environment, but because the exploration of the underwater world can only be fulfilled by remotely operated vehicles.

- A The exploration of the underwater world has been accomplished thanks to remotely operated vehicles although benefitting from the ocean for its precious assets is a slow process because of the basic features of the environment.
- B The fact that the exploration of the underwater world can only be fulfilled by remotely operated vehicles slows down the process of benefitting from the ocean for its great treasures; however, the nature of the environment is a bigger culprit.
- C Remotely operated vehicles have enabled the exploration of the underwater world in order to benefit from its great assets, but the typical features of the environment slow down the process.
- D While benefitting from the ocean for its precious treasures is a slow process given the nature of the environment, the underwater world can be mostly explored with remotely operated vehicles.
- E Both the exploration of the underwater world that can only be carried out by remotely operated vehicles and the basic characteristics of the environment account for why benefitting from the ocean for its precious assets is a slow process.

75.

72-75 : For these questions, choose the best option to complete the missing part of the passage.

Tracking users online is less about providing a service for users and more about advertising and making profits. Advertisers pay to place their products and services in front of certain people that they feel may be potential customers. Tracking, via large data-collecting companies, allows them to do that. ---- Therefore, governments around the world are increasingly legislating to rein in these tech giants that are responsible for this data-collecting issue. Nowadays some companies are reacting to changing customer sentiment by altering the way they track users, but the truth is that they are also being forced to act.

- (A) Cookies are small bits of software that are implanted by a website into the computer of a visitor and are then used for tracking purposes.
- (B) The changes are likely to make life harder for advertisers, which have grown used to being able to access a wealth of data and closely target adverts.
- (C) When visiting a website, your browser will allow advertisers access to some topics, chosen at random, so they can decide which adverts to show you.
- (D) But many people are growing more and more uncomfortable with the extent to which firms track, analyse, and market to them.
- (E) A new tool, for instance, keeps our identity and movements hidden from advertisers, but in a slightly different way.

77.

76-80 : For these questions, choose the irrelevant sentence in the passage.

(I) In the past, historians believed that the extensive irrigation systems used in southern Mesopotamia led to the formation of the first urban civilisations. (II) They argued that the amount of planning and organising necessary to create and tend the complex network of canals generated a complex political structure in which leaders dominated the great masses of people. (III) Few scholars now agree with such a straightforward link of cause and effect. (IV) Agriculture produced a more secure supply of food, and that promoted population growth. (V) Nevertheless, the adoption of agriculture did have a significant impact on human society.

- (A) I
- (B) II
- (C) III
- (D) IV
- (E) V

77.

76-80 : For these questions, choose the irrelevant sentence in the passage.

(I) In the past, historians believed that the extensive irrigation systems used in southern Mesopotamia led to the formation of the first urban civilisations. (II) They argued that the amount of planning and organising necessary to create and tend the complex network of canals generated a complex political structure in which leaders dominated the great masses of people. (III) Few scholars now agree with such a straightforward link of cause and effect. (IV) Agriculture produced a more secure supply of food, and that promoted population growth. (V) Nevertheless, the adoption of agriculture did have a significant impact on human society.

- A I
 B II
 C III
 D IV
 E V

75.

72-75 : For these questions, choose the best option to complete the missing part of the passage.

Tracking users online is less about providing a service for users and more about advertising and making profits. Advertisers pay to place their products and services in front of certain people that they feel may be potential customers. Tracking, via large data-collecting companies, allows them to do that. But many people are growing more and more uncomfortable with the extent to which firms track, analyse, and market to them. Therefore, governments around the world are increasingly legislating to rein in these tech giants that are responsible for this data-collecting issue. Nowadays some companies are reacting to changing customer sentiment by altering the way they track users, but the truth is that they are also being forced to act.

- A Cookies are small bits of software that are implanted by a website into the computer of a visitor and are then used for tracking purposes.
 B The changes are likely to make life harder for advertisers, which have grown used to being able to access a wealth of data and closely target adverts.
 C When visiting a website, your browser will allow advertisers access to some topics, chosen at random, so they can decide which adverts to show you.
 D But many people are growing more and more uncomfortable with the extent to which firms track, analyse, and market to them.
 E A new tool, for instance, keeps our identity and movements hidden from advertisers, but in a slightly different way.

68.

68-71 : For these questions, choose the best rephrased form of the given sentence.

Tapping the ocean for its valuable properties is a slow process, not just because of the nature of the environment, but because the exploration of the underwater world can only be fulfilled by remotely operated vehicles.

- (A) The exploration of the underwater world has been accomplished thanks to remotely operated vehicles although benefitting from the ocean for its precious assets is a slow process because of the basic features of the environment.
- (B) The fact that the exploration of the underwater world can only be fulfilled by remotely operated vehicles slows down the process of benefitting from the ocean for its great treasures; however, the nature of the environment is a bigger culprit.
- (C) Remotely operated vehicles have enabled the exploration of the underwater world in order to benefit from its great assets, but the typical features of the environment slow down the process.
- (D) While benefitting from the ocean for its precious treasures is a slow process given the nature of the environment, the underwater world can be mostly explored with remotely operated vehicles.
- (E) Both the exploration of the underwater world that can only be carried out by remotely operated vehicles and the basic characteristics of the environment account for why benefitting from the ocean for its precious assets is a slow process.

65.

63-67 : For these questions, choose the best option to complete the dialogue.

Margaret:

- George, isn't cartoon the same as animation? Why are they used as different concepts in my coursebook?

George:

- Well, technically speaking, animation is defined as a production technique that uses cartoon-like figures to create the illusion of movement via the use of sequences of cartoons, drawings, graphics, and models to simulate real-life characters in apparent motion.

Margaret:

- I see. Do you happen to know anything about the origin of animation?

George:

- It began with thumbing a series of pages or the corners of cards, and then artists developed the first animated movies using drawings on transparent celluloid sheets.

Margaret:

- So, why do some of them seem to be actual things rather than cartoon figures?

George:

- That's due to the application of another technique which involves the creation of 3-D figures that are posed and photographed for hundreds of thousands of times to finally make them look like a film.

- (A) So, why do some of them seem to be actual things rather than cartoon figures?
- (B) Do you think they can move or talk and adaptively interact with the audience?
- (C) What about computer-made animations? Do they also use the same technique?
- (D) What are the techniques of creating an active background while producing animations?
- (E) Could you also explain about the reason why children like animations having dolls more than painted ones?

40.

37-42 : For these questions, choose the most accurate Turkish translation of the sentences in English, and the most accurate English translation of the sentences in Turkish.

Bedenimiz ve duygularımız arasındaki bağlantıya dair farkındalığın ortaya çıkışı, Amerikalı düşünür William James'in mutlu olduğumuz için gülmediğimizi, aksine güldüğümüz için mutlu olduğumuzu ileri sürdüğü 19. yüzyıla dayanır.

- A** The emergence of the awareness of a link between our body and our emotions goes back to the 19th century, when the American philosopher William James suggested that we do not laugh because we are happy, rather we are happy because we laugh.
- B** In the 19th century, the American philosopher William James claimed that we do not laugh because we are happy, rather we are happy because we laugh, which led to the emergence of the awareness of a link between our body and our emotions.
- C** The emergence of the awareness of a link between our body and our emotions, which was thanks to the American philosopher William James suggesting that we do not laugh because we are happy, rather we are happy because we laugh, dates back to the 19th century.
- D** The suggestion of the American philosopher William James that we do not laugh because we are happy, rather we are happy because we laugh raised an awareness of a link between our body and our emotions in the 19th century.
- E** The link between our body and our emotions led to the emergence of an awareness dating back to the 19th century, when the American philosopher William James suggested that we do not laugh because we are happy, rather we are happy because we laugh.

31.

27-36 : For these questions, choose the best option to complete the given sentence.

Because hackers constantly improve at penetrating cyber defences to steal valuable documents, researchers propose using an artificial-intelligence algorithm to confuse them by hiding the real information among the fakes.

- A** they generally invite other hackers to get into systems to demonstrate their exceptional merits and successes
- B** researchers propose using an artificial-intelligence algorithm to confuse them by hiding the real information among the fakes
- C** they often extend their zealous explorative tendencies to others' computers, breaking into networks and corporate computers
- D** electronic theft involves them using Internet banking connections to make money transfers from legitimate accounts to bogus accounts
- E** it is debatable that some hacking activity can be justified in terms of its social benefits, at least when it results in no harm to innocent people
