27. **Yeme bozuklukları, varlıklı kültürlerde varlıklı olmayanlardan daha sık meydana gelir ama sadece iyi durumda olanlara özgü değildir.**

- ✓ A) Eating disorders occur more frequently in affluent cultures than in non-affluent ones, but they are not exclusive to the well-off.
- B) While eating disorders are seen more frequently in affluent cultures than in non-affluent ones, they are not exclusive to the well-off.
- C) Not exclusive to the well-off, eating disorders occur more frequently in affluent cultures than in non-affluent ones.
- Although D) As frequently as they occur in affluent societies compared to non-affluent ones, eating disorders are not limited to the well-off.
- E) Eating disorders are by no means exclusive to the well-off, yet they occur more frequently in affluent cultures than in non-affluent ones.

28. **Öte yanındaki işçi sınıfı bölgelerinde çaresiz bir fakirlik varken 20. Yüzyıl başları Viyana'sındaki iç şehrin etkileyici mimarisi muazzam bir zenginlik barındırmaktaydı.**

- A) The impressive architecture of the inner city in early 20th century Vienna sheltered immense wealth, but desperate poverty was rampant in the working-class districts beyond.
- B) Regardless of the fact that the impressive architecture of the inner city in early 20th century Vienna sheltered immense wealth, the working-class district beyond it was desperately poor. m
- C) While working-class districts in early 20th century Vienna were in desperate poverty, the impressive architecture of inner city just beyond sheltered immense wealth.
- D) As the impressive architecture of the inner city in early 20th century Vienna sheltered immense wealth, the working-class districts beyond were doomed to desperate poverty.
- ✓ E) The impressive architecture of the inner city in early 20th century Vienna sheltered immense wealth, while there was desperate poverty in the working-class districts beyond.

29-32: Answer these questions according to the passage below.

According to Roman mythology, which reinterpreted many Greek myths, Cupid was a god born of Mercury, the messenger of the gods, and Venus, the goddess of love. Armed with a bow and arrows, he dealt in love and passion, forcing it upon his victims with the prick of an arrow. His Greek counterpart has a murkier background. Some early stories claim Eros was a primeval god believed to be the son of Chaos. Later Greek mythology established him as the son of Aphrodite, goddess of love and beauty. Although the identity of his father is unclear, Eros is most commonly said to be the son of Ares, the god of war. Like the Roman god Cupid, Eros concerned himself with love and passion, making mischief and playing with lives by piercing humans and gods alike with his enchanted arrows. Today, the Valentine Cupid is seen as one of the most iconic symbols of love and romance, but his journey to becoming the poster boy for Valentine's Day was a long one, with some twists along the way. In the original Greek myths, Eros played with the emotions of both gods and mortals, and not always in the nicest of ways. In one story, he caused the god Apollo to fall in love with the nymph Daphne – then made sure the love was one-sided. In other stories, love turned dangerous.

29. It is implied in the passage that ----.

- A) Cupid was a mischievous boy before he became a popular poster boy
- B) the writer favours Cupid over Eros as he is more popular today
- C) Eros was the son of Apollo and Daphne according to Greek mythology
- D) Cupid had an evil brother called Eros, whose reputation couldn't make it to our present day
- E) Eros and Cupid are the same characters in mythology

31

According to Roman mythology, which reinterpreted many Greek myths, Cupid was a god born of Mercury, the messenger of the gods, and Venus, the goddess of love. Armed with a bow and arrows, he dealt in love and passion, forcing it upon his victims with the prick of an arrow. His Greek counterpart has a murkier background. Some early stories claim Eros was a primeval god believed to be the son of Chaos. Later Greek mythology established him as the son of Aphrodite, goddess of love and beauty. Although the identity of his father is unclear, Eros is most commonly said to be the son of Ares, the god of war. Like the Roman god Cupid, Eros concerned himself with love and passion, making mischief and playing with lives by piercing humans and gods alike with his enchanted arrows. Today, the Valentine Cupid is seen as one of the most iconic symbols of love and romance, but his journey to becoming the poster boy for Valentine's Day was a long one, with some twists along the way. In the original Greek myths, Eros played with the emotions of both gods and mortals, and not always in the nicest of ways. In one story, he caused the god Apollo to fall in love with the nymph Daphne – then made sure the love was one-sided. In other stories, love turned dangerous.

30. It is made clear in the passage that the identity of Eros' father in Greek mythology ----.

- A) was not known for sure, with different figures cited as his father
- B) was loud and clear: he was son of Mercury, the messenger of gods
- C) was deliberately left unclear to create a murky character out of him
- D) was shrouded in mystery as he was actually the son of Chaos
- E) is symbolized with a bow and arrows which are used to force love upon its victims

According to Roman mythology, which reinterpreted many Greek myths, Cupid was a god born of Mercury, the messenger of the gods, and Venus, the goddess of love. Armed with a bow and arrows, he dealt in love and passion, forcing it upon his victims with the prick of an arrow. His Greek counterpart has a murkier background. Some early stories claim Eros was a primeval god believed to be the son of Chaos. Later Greek mythology established him as the son of Aphrodite, goddess of love and beauty. In one story, he caused the god Apollo to fall in love with the nymph Daphne – then made sure the love was one-sided. In other stories, love turned dangerous.

31. According to the passage, the Valentine Cupid that we know today as the symbol of romance ----.

- A) may not be so popular in different cultures around the world
- B) was once known as the son of Chaos, one of the vilest gods in mythology
- C) did actually exist during the times of Roman Empire
- ✓ D) has its roots in mythology, sometimes with dark twists in the story
- E) has not always carried a bow and arrows, especially in Roman mythology

According to Roman mythology, which reinterpreted many Greek myths, Cupid was a god born of Mercury, the messenger of the gods, and Venus, the goddess of love. Armed with a bow and arrows, he dealt in love and passion, forcing it upon his victims with the prick of an arrow. His Greek counterpart has a murkier background. Some early stories claim Eros was a primeval god believed to be the son of Chaos. Later Greek mythology established him as the son of Aphrodite, goddess of love and beauty. Although the identity of his father is unclear, Eros is most commonly said to be the son of Ares, the god of war. Like the Roman god Cupid, Eros concerned himself with love and passion, making mischief and playing with lives by piercing humans and gods alike with his enchanted arrows. Today, the Valentine Cupid is seen as one of the most iconic symbols of love and romance, but his journey to becoming the poster boy for Valentine's Day was a long one, with some twists along the way. In one story, he caused the god Apollo to fall in love with the nymph Daphne – then made sure the love was one-sided. In other stories, love turned dangerous.

32. Which of the following describes the main purpose of the passage?

- A) To give detailed background information about Valentine's Day
- B) To explain why Cupid is mistaken for Eros in some cultures
- C) To provide information about the popular figure of the Valentine Cupid
- D) To discuss the reliability of the stories in both Roman and Greek mythologies
- E) To dwell on our obsession with Valentine's Day, with an emphasis on Cupid

33-34: For these questions, choose the best option to complete the dialogue.

33.

Sean:

- **Hear this one out:** athletes at American colleges can make \$1 million a year from sponsorship deals.

Liam:

- **That is quite normal.**

Sean:

- ----

Liam:

- **Well, NIL, which stands for name, image and likeness, is big in the USA. Successful athletes can land lucrative deals even at unimportant small colleges.**

Sean:

- **The USA is a totally different story.**

- A) I am quite intrigued. Can you please explain it for me?
- B) You always have this laconic attitude and never explain what you think.
- C) What now? You are also familiar with how much college athletes are earning?
- D) Not so much here in Ireland. Let alone students, even many pro athletes are poor.
- E) As far as I am concerned, that amount is way too much for a student.

35-36: For these questions, choose the best rephrased form of the given sentence

35. For those who have not been directly affected by it, the ongoing war in Ukraine and its casualties have been shifting to the periphery of their attention.

- A) People who have not been affected by the ongoing war in Ukraine and its casualties have started to ignore the events altogether.
- B) People who have not been affected by the ongoing war in Ukraine and its casualties have been paying less attention to them.
- C) People have been shifting their attention to other things than the ongoing war in Ukraine and its casualties as they aren't directly affected by it.
- D) If people had been affected by the ongoing war in Ukraine and its casualties, they would be paying more attention to it now.
- E) Those who have shifted their attention from the ongoing war in Ukraine and its casualties are the ones who are not affected by it.

1. T.i.i.

36. Female astronauts are currently less likely to be selected for missions than men because their bodies tend to hit NASA's maximum acceptable threshold of radiation earlier.
- A) As male astronauts' bodies tend to reach NASA's maximum threshold of radiation much later than women's, they are currently more likely to be selected for missions.
- B) If the bodies of female astronauts didn't tend to hit NASA's maximum threshold of radiation earlier, they would be more likely to be selected for missions than men.
- C) The bodies of female astronauts are prone to reaching NASA's maximum threshold of radiation earlier than men's, so men are currently more likely to be selected for missions.
- D) One reason why men are currently more likely to be selected for missions than women is that the bodies of female astronauts hit NASA's maximum threshold of radiation earlier.
- E) Though there is practically no difference between men and women astronauts in terms of the speed at which their bodies reach NASA's maximum threshold of radiation, men are currently more likely to be selected for missions.

37-38: For these questions, choose the best option to complete the missing part of the passage.

- 7mk
37. The popularity of many flat-faced dog breeds such as French bulldogs has risen dramatically in recent years despite regular assertions that they are prone to many health issues including breathing problems and sore eyes. ---- Now, a study led by the Royal Veterinary College's VetCompass programme has confirmed that flat-faced dogs are more likely to suffer from a range of health disorders caused by seemingly harmless bacteria.
- A) Thus, findings support the general agreement by academics that intervention is needed to breed dogs with less extreme body shapes.
- ✓ B) However, there has long been limited reliable evidence on the wider general health of flat-faced dogs compared to other dogs.
- C) Yet, different levels of risk for 10 out of the 30 common disorders have been found across both groups.
- D) For instance, flat-faced dogs are more than eight times more likely to suffer from the painful eye disease Corneal ulceration.
- E) In addition, French Bulldogs are more likely to be diagnosed with 20 common health disorders when compared to other dog breeds.

38. Computer security is becoming more and more advanced, and computer systems are becoming more complicated, so it is a more difficult task to attack or intrude into well-established computer networks. However, there are more and more internet-enabled devices in the world, many of which run relatively simple software. Therefore, there are endless opportunities for hackers to exploit the security loopholes in central heating controllers, smartwatches, websites, smartphones, game consoles, CCTV cameras, vehicle controllers or even electronic toilets.

- A) You might get clues that your smart phone has been hacked if your battery drains quickly when not in use.
- B) Some malware or spyware hacker use is so clever that even performing a factory reset, which should wipe everything, does not work.
- C) In a controlled experiment last year, two hackers successfully disabled a Jeep as it drove along an American highway.
- D) In this respect, hacking is more difficult and requires greater expertise compared to 20 years ago. *mantı ina aykırı olurdu*
- E) You could stay off the network altogether to stop your phone from being hacked, but that would defeat the object of having a mobile phone. *there is no point in having a phone*

39-40: For these questions, choose the irrelevant sentence in the passage.

39. (I) Skin, among its other intriguing features, is the largest and fastest-growing organ in the body. (II) It is vulnerable to bruises, dryness, callouses, hives, sunburn and scar tissue. (III) It provides a waterproof yet breathable barrier that protects us from the elements, parasites and pathogens. (IV) It is strong, yet extremely flexible despite many skin ailments that can at best irritate us and at worst seriously harm our health. (V) It helps regulate body temperature, reduces water loss and manufactures vitamin D.

- A) I B) II C) III D) IV E) V
- + - + + +

40. (I) When a three-year-old boy was laid to rest by Stone Age people in East Africa, little did they know that his legacy would be honoured by humans 78,000 years later. (II) Discovered in Panga ya Saidi, a cave near the Kenyan coast, this child's grave is Africa's oldest human burial, according to a detailed report published in Nature. (III) Humans occupied the Panga ya Saidi cave complex for 78,000 years and lived there as recently as 500 years ago. (IV) Older burials of Homo sapiens and Neanderthals have been discovered in the Middle East, dating as far back as 120,000 years. (V) However, the little boy's grave is exciting to researchers because it provides the strongest clues about how burying the dead was a ritual practice for early humans living in Africa.

A) I

B) II

C) III

D) IV

E) V
