16. While **large language models**, which generate text to mimic human speech and writing, may be human-like, ----.

- A) the arrival of these human-sounding models started a race to teach them how to effectively manipulate tools
- B) they have been trained with so much information that they can answer almost any question without any sign of superficiality
- C) they draw their information from billions of words about how humans do or say things, giving them authenticity
- D) they are considered far from being skilled like humans and can fail to fully appreciate the implications of a request
- E) some developers are attempting to create models that generate not just language but images and sounds as well

Far from: den uzak

I am far from being knowledgeable about AI systems.

**17. If the metabolizable energy of the food is insufficient to meet the demand of the body, ----.**

- A) conservation of energy necessitates that food energy intake is balanced by energy lost
- B) energy retention can be negative and the body consumes its own energy reserves
- C) the digestible energy consists of nutrients that are absorbed from the gut
- D) there is the basal energy requirement for maintenance of vital functions
- E) excess food intake leads to the deposition of body fat that retains in the body

**22. The accepted wisdom was once that the complexity of a modern fighter aircraft's avionics systems made it impossible for a pilot to fly alone, ----.**

A) but improvements in cockpit design and the use of computers have greatly reduced the workload

B) yet no amount of newly-developed technology can fully protect a pilot from the stress of g-force (the force caused by gravity)

C) so the new generation of jet fighter was a response to the demand for a cheaper aircraft

D) though it is an established fact that the more unstable an aircraft is the more agile it will be

E) otherwise designers and pilots had to choose between stability and manoeuvrability throughout aviation history
