

Text 1 Soruları aşağıdaki parçaya göre cevaplayınız.

Japan in the mid-19th century was closed to foreigners, and had been that way for more than 200 years; only a few Dutch and Chinese traders entered Japan's harbours. So observers in Tokyo Bay were shocked when, on July 8, 1853, four black ships cruised into the harbour. The boats were commanded by Commodore Matthew C. Perry of the US, who bore a letter from President Millard Fillmore to the emperor of Japan, requesting a treaty. Perry refused Japanese orders to leave the harbour, insisting that he would deliver the letter by force, if necessary. Having finally handed the letter to a hesitant pair of Japanese princes, Perry departed, leaving word that he would return for an answer. By the time he came back in 1854, the Japanese government had realized it would have to admit the terms of the treaty. Without its own navy, Japan could not withstand an American attack. The Treaty of Kanagawa opened up Japan to trade from the West. The Japanese agreed to admit US ships to two ports and to allow American ships to pick up supplies and fuel in Japan. Subsequent treaties with other Western nations followed, leading to a number of positive social and economic changes that would bring modernization to Japan.

1. It is clearly stated in the passage that ----.

- A) Perry was not satisfied with the answer of the Japanese government when he came back in 1854
- B) Japan's harbours had been effectively used by many Dutch and Chinese traders before 1854
- C) Perry had to use force in order to get the Japanese government to admit the treaty
- D) the observers in Tokyo Bay were expecting American ships to visit Japan's harbours in 1853
- E) Japan had hardly ever accepted outside influences until 1854

Subsequent treaties with other Western nations followed, leading to a number of positive social and economic changes that would bring modernization to Japan.

2. One can infer from the passage that the Treaty of Kanagawa ----.

- A) allowed the US to help Japan to build a modern navy and have good harbours
- B) offered a variety of benefits to Japan although it was initially reluctant to accept it
- C) led Japan to make treaties with other Western nations, which caused it to lose its effective harbours
- D) was strongly supported by the Japanese government since it would bring economic prosperity to Japan
- E) was designed by Commodore Matthew C. Perry under the order of President Millard Fillmore

Text 2. souları aşağıdaki parçaya göre cevaplayınız.

Stress is a common factor in the workplace, and more and more people are experiencing it. Some jobs are clearly more stressful than others. But what are the factors that contribute to this? It would appear that the number of decisions to be made on the job, contrary to popular belief, is not a valid indicator of stress. People who have some measure of control over their work, such as top executives of large corporations, actually have less stressful jobs than those who do not, such as food service workers and middle-level managers. Jobs with high demands, low control and little support are major contributors to increased stress levels. When workplace problems spill over into the family environment, it is inevitable that stress levels will further increase. This is the situation faced by many couples today who experience serious problems when family demands come into conflict with work demands. In many families, there still exists the expectation that women will fulfill the majority of household and child-care duties while at the same time being employed. This creates an even more stressful situation for women and is very different from the stress typically experienced by men.

1. Which of the following statements is true about work-related stress?

- A) Food service workers are less susceptible to stress than executives. open b
- B) Those who lack control over their work are subject to more stress than those who do not. exposed
- C) Middle-level managers tend to be less stressed than other members of staff in a workplace.
- D) Large corporations usually employ individuals who can cope with too much stress. f
- E) Executives experience difficulty in managing the stressful environment in large corporations. 4

4

=

Text 3 Soruları aşağıdaki parçaya göre cevaplayınız.

Iconic individuals such as Steve Jobs, Martha Stewart and many others have inspired entrepreneurs and professionals to sharpen their creative skills. Individuals and companies have typically used creativity workshops, brainstorming sessions, training videos and even hypnosis as vehicles for such improvement. Whether such practices influence the likelihood of such creative leaps is unknown. Nonetheless, psychologists have made some important discoveries that can help us understand the states of mind that benefit creative thought. When people consider creativity, they generally think of the birth of ideas different from anything known before. Idea generation is indeed the first important stage of the creative process. To generate new ideas for achieving a goal, you need an open mind, that is, one guided by minimal rules. Experts have proven that creative inspiration might benefit from a state of lower cognitive control, that is, fewer restrictions on your thoughts.

1. The author gives Steve Jobs and Martha Stewart as examples of ----.

- A) celebrities trying to improve their creative skills
- B) individuals inspired by successful entrepreneurs
- C) people who are highly creative
- D) successful people in their areas of interest
- E) iconic people receiving help from professionals

Paragraph 4 Soruları aşağıdaki parçaya göre cevaplayınız.

It does not matter what a company calls its weight-loss program, none have been shown through reliable research to lead to long-term weight loss for more than a minority of those who use it. You might have noticed that many diet companies no longer use the word 'diet'; they talk about 'lifestyle' instead. But diets are still what they sell. The multi-billion-dollar diet industry has a huge advertising presence, and your daughter will see the advertisements everywhere. This decades-long marketing effort has convinced most people of a false idea - that fat people are fat because they lack the determination to keep weight off over a long period of time. We are taught to ignore fat people, to be fearful of becoming one of them, or if we are already fat, to do all that we can to shape our bodies into a slimmer physique. The incredible thing is that after all this marketing and all the government campaigns, there is not a single country in the world that has successfully reduced obesity rates.

1. The author stresses that weight-loss programs ----

- .
A) play a significant role in informing people about the dangers of obesity
- B) should involve children to help them avoid obesity
- C) are remarkably useful even though a small number of people go on a diet
- D) get poor support from the advertising sector although they are very common
- E) are not supported by careful scientific studies

Paragraph 5 Soruları aşağıdaki parçaya göre cevaplayınız.

Every few years, decisions on how European funds for agriculture will be distributed to farmers are made, and they have massive implications for much of England's wildlife. The way we farm has huge impacts on our birds, bees and butterflies. Currently, roughly 70 percent of England is farmed, and of that, about 70 percent is under some kind of program whereby the land manager receives a payment for conserving wildlife - so-called agrienvironment (AE) schemes. But birds and insects are disappearing at a disturbing rate - since 1970, the number of birds on our farms has been decreasing. It was hoped that the launch of AE schemes would reverse these losses in ten years. In fact, all that has been achieved is that the decline is occurring more slowly. Some conservationists say that among the schemes available to farmers, the 'Entry Level' scheme that most farmers sign up to is not sufficiently targeted. Farmers choose the easy options, and few gains are made. However, it can be much better if a range of measures that benefit a species over its life cycle are used.

1. According to the passage, the current situation of AE schemes indicates that ----.

- A) the harmful effects of farming on wildlife have been handled effectively
- B) the losses in wildlife have been compensated for over the last ten years
- C) farmers should be paid more to conserve wildlife on their lands
- D) they should be redesigned because there has still been a decrease in the number of some species
- E) they have been successful in their attempts to make governments take important actions to conserve

3. The primary purpose of the author is to ----.

- A) draw attention to the low number of AE schemes available to farmers
- B) emphasize the importance of AE schemes to protect wildlife successfully
- C) show that decisions on the distribution of European funds should be made by conservationists not the governments
- D) give information about the 'Entry Level' scheme, which is the most effective AE scheme
- E) reveal that farmers in England cannot receive adequate support from the government to conserve wildlife

Every few years, decisions on how European funds for agriculture will be distributed to farmers are made, and they have massive implications for much of England's wildlife. The way we farm has huge impacts on our birds, bees and butterflies. Currently, roughly 70 percent of England is farmed, and of that, about 70 percent is under some kind of program whereby the land manager receives a payment for conserving wildlife - so-called agrienvironment (AE) schemes. But birds and insects are disappearing at a disturbing rate - since 1970, the number of birds on our farms has been decreasing. It was hoped that the launch of AE schemes would reverse these losses in ten years. In fact, all that has been achieved is that the decline is occurring more slowly. Some conservationists say that among the schemes available to farmers, the 'Entry Level' scheme that most farmers sign up to is not sufficiently targeted. Farmers choose the easy options, and few gains are made. However, it can be much better if a range of measures that benefit a species over its life cycle are used.

4. The attitude of the author towards the efficacy of agrienvironment schemes is ----.

- A) dissatisfied
- B) indifferent
- C) sarcastic
- D) appreciative
- E) biased

Farmers choose the easy options, and few gains are made. However, it can be much better if a range of measures that benefit a species over its life cycle are used.

5. What could be the best title for this passage?

- A) A Detailed Analysis of Agrienvironment Schemes
- B) The Influence of European Funds on Agriculture
- C) Farmers Choose the Easy Options. Why?
- D) Payment for Conserving Wildlife Holds Promise
- E) Not Enough is Done to Save the Species in Decline
