

Chickenpox can be a [bothersome] illness, (1)--- it is generally harmless in most cases. (2)--- it is highly contagious, it can spread easily among individuals, particularly children. However, modern medicine has empowered us (3)--- a vaccine to prevent this disease. By [immunizing against chickenpox] we can (4)--- reduce its prevalence and the potential ruin it can bring to individuals and communities.

vaccination AGAINST a disease

1. A) unless ~~X~~ B) although C) because ~~X~~
