

In Byzantine society, clothing held great significance and played a crucial role (1) in expressing one's social standing and cultural identity. The attire (2) by individuals varied depending on their gender, occupation, and wealth. The Byzantines had a rich and diverse wardrobe, with vibrant colors, intricate patterns, and luxurious fabrics. Clothing was not only a practical necessity but also a means of showcasing one's status, taste, and adherence (3) to societal norms.

1. A) on  in C) for  
 2.  worn B) ~~wearing~~ C) ~~to wear~~

Spanish is the official language of Spain, spoken by the majority of its population. However, there are regions where other languages, such as Basque, are also spoken. Although Spanish is widely used, the preservation of regional languages is important because it reflects the cultural diversity and heritage of the country. Bilingualism is encouraged, allowing people to maintain their linguistic identity while also embracing the national language.
