68-71 : For these questions, choose the best rephrased form of the given sentence.

While there are many speculations about the origin of human language, we have little, if any, solid evidence to indicate when it originated and how it evolved from its earlier stages.

- (A) Since we do not have any compelling evidence on when human language appeared and how it later became complicated, we cannot refute any speculations about its origin.
- (B) Although we have a certain amount of evidence about the origin of human language, most of our knowledge is still based on speculations that do not clearly show when it began to exist and how it matured following its initial stages.
- (C) The lack of reliable evidence showing when human language emerged and how it thrived starting from its earlier stages accounts for the high number of speculations regarding its origin.
- (D) Despite the existence of numerous suggestions concerning the origin of human language, there is hardly any conclusive evidence revealing when it came into being and how it advanced following its initial phases.
- (E) We have almost no evidence relating to the emergence and earlier phases of human language, and we are also overwhelmed by various speculations about its origin, none of which can be supported through convincing evidence.

72-75 : For these questions, choose the best option to complete the missing part of the passage.

When this is the case, Accordingly, hal böyle olunca, buna uygun olarak Thus /Therefore, Hence

---- ^{if so} As such, investors have poured vast sums into artificial meat start-ups in recent years. One estimate by one US consultancy firm suggests that 35 percent of all meat consumed globally will be cell-based by 2040. Artificial meat can be produced faster and more efficiently than traditional meat, requiring a tiny fraction of the land. It faces, however, competition from insect-derived products and plant-based imitation meats, which consumers are already buying in increasing numbers.

- (A) Large numbers of people switching to artificial meat could lead to big cuts in these gases, particularly methane.
- (B) The global food system is under huge pressure from climate change, a growing population and increasing demand for animal products.
- (C) A study at Oxford University has suggested that carbon dioxide emissions from powering artificial meat production facilities could be more damaging over the next 1,000 years.
- (D) Artificial meat producers need to take extra care to keep everything sterile because the nutrient-rich environment in the bioreactors is a perfect breeding ground for bacteria.
- (E) Some people have raised concerns over the growth factors added to stem cells, which include hormones.
