23. - 25. soruları aşağıdaki parçaya göre cevaplayınız.

For more than 4,000 years, Asians have been using acupuncture. It is an old Chinese form of healing in which your skin is pierced with thin needles to treat illnesses and relieve pain. Today, it is also popular in Europe, America and Australia. Some doctors use it along with regular treatments for many diseases. Many patients feel more energy after a treatment, while others may feel more relaxed. During treatment, needles are stuck into certain points of the body, each of which has a certain effect on the body. Chinese medicine teaches us that all acupuncture points are located along pathways called meridians. Each meridian carries some energy called "qi". If it gets blocked, the person develops an illness or feel pain. Sticking needles into the correct points can help "qi" flow again and make the person feel better. However, it is still unknown how acupuncture really works. There is no proof that these pathways of energy really exist. Some think needles cause the body to produce pain killing substances. Others believe they block pain signals travelling along the nerves to the brain. Some say acupuncture works simply because patients believe in it.

23. Which of the following can be said about acupuncture?

- A) It is currently the best method to help people get rid of their pain.
- B) It is a common practice in Asia used instead of regular treatments.
- C) It is widespread in many parts of the world apart from Asia.
- D) Needles used in this method of treatment are placed randomly on the body.
- E) It works better when the patient really believes in its positive effects.

24. It can be inferred from the passage that ----.

- A) the efficiency of the acupuncture depends on the number of needles used
- B) acupuncture is not considered a scientific method despite its popularity
- C) Chinese medicine has recently become more popular than western medicine
- D) there is growing body of evidence showing that acupuncture does not really work
- E) there can be some risks involved in the practice of acupuncture

25. It is understood from the passage that ----.

- A) acupuncture works best when it is practiced together with regular treatment
- B) the position of needles stuck into your body depends on the type of illness
- C) it has been proven that "qi" is closely linked to some health conditions
- D) most western doctors are reluctant to use acupuncture as a treatment method
- E) how patients react to acupuncture treatment may vary
