29. Although the idea of "wildlife" is taken to mean animals not bred or controlled by humans, ----.

- A) increasingly, wild animals are not just left alone to live their own lives
- B) some animal diseases can be found in the world of agriculture, where trading animals is commonplace
- C) the farming industry is not the only domain of human life you will find such animals
- D) a nature and wildlife protection movement has grown over the last two centuries
- E) animals have always been a part of human lives and economies

30. While it is tempting to assume that anyone who refuses a vaccine does so on the same grounds or assumptions, ----.

- A) there certain groups that benefit more from the protection provided by such vaccines throughout the world
- B) many online commentators claim that the vaccine hesitant people are simply ignorant or selfish, which is quite unfair
- C) vaccine choices are often the result of many complicating factors that need to be addressed sensitively
- D) even a delay in deciding whether to get a shot or not is considered a threat to health because viral infections spread very quickly
- E) the reasonable fears of most vaccine hesitant people should not be confused with the bizarre theories of fixed anti-vaxxers

31-34: For these questions, choose the most accurate Turkish translation of the sentences in English, and the most accurate English translation of the sentences in Turkish.

31. India, home to 22 of the world's 30 most polluted cities, has the world's worst air pollution and its toxic air leads to the death of more than one million people each year.

- A) Dünyanın en kirli 30 şehrinin 22si Hindistan'dadır ve zehirli havası her yıl bir milyondan fazla kişiyi öldüren bu ülke, dünyanın en kötü hava kirliliğine sahiptir.
- B) Dünyadaki en kötü hava kirliliğine sahip olan Hindistan, dünyanın en kirli 30 şehrinin 22sine ev sahipliği yapmaktadır ve oradaki zehirli hava her yıl bir milyondan fazla insanın ölümüne yol açar.
- C) Hindistan, dünyanın en kirli 30 şehirden 22sine sahiptir ve havası da dünyadaki en kirli havadır; bunun yanında, her yıl bir milyondan fazla kişi hava kirliliği yüzünden hayatını kaybetmektedir.
- D) Dünyanın en kirli 30 şehrinin 22sine ev sahipliği yapan Hindistan, dünyanın en kötü hava kirliliğine sahiptir ve zehirli havası her yıl bir milyondan fazla insanın ölümüne yol açar.
- E) Hindistan'ı dünyanın havası en kirli ülkesi yapan şey, dünyanın en kirli 30 şehirden 22sine sahip olmasıdır ve zehirli havası her yıl bir milyondan fazla insanın ölümüne yol açar.

32. When you think of your retirement savings, your bank, or your investments, it is unlikely that you associate these with trees being chopped down in lush tropical rainforests.

- A) Emeklilik birikimlerinizi, bankanızı veya yatırımlarınızı düşündüğünüzde yemyeşil tropik ormanlarda kesilmekte olan ağaçlarla bunlar arasında bağlantı kurmanız pek olası değil.
- B) Hiç kimsenin aklına emeklilik birikimlerini, bankalarını ya da yatırımlarını düşündüğünde yemyeşil tropik ormanlarda kesilmekte olan ağaçlar gelmez.
- C) Emeklilik birikimleriniz, bankanız veya yatırımlarınız aklınıza gelince bunları yemyeşil tropik ormanlarda kesilmekte olan ağaçlarla ilişkilendirmeniz olası değil.
- D) Emeklilik birikimlerini, bankalarını ya da yatırımlarını düşünen insanların akıllarına bunları yemyeşil tropik ormanlarda kesilmekte olan ağaçlar ile ilişkilendirmek gelmez.
- E) Emeklilik birikimlerinizi, bankanızı veya yatırımlarınızı düşündüğünüzde bunları yemyeşil tropik ormanlarda kesilmekte olan ağaçlarla ilişkilendirmeniz olası değil.

21

33. Bazı insanlar, boş zamanlarını en iyi seçeneklerle doldurmak için muazzam bir baskı hissederek ancak eğlencemizi en yükseğe çıkarma baskısı boş zamanımızdan alacağımız zevkin önüne geçebilir.

- A) Though some people feel enormous pressure to fill their downtime with the best choices, this pressure to maximise our fun might get in the way of our enjoyment of leisure itself.
- B) Some people might feel enormous pressure to fill their downtime with the best choices, yet this pressure to maximise our fun will mostly get in the way of our enjoyment of leisure itself.
- C) The pressure to maximise our fun might get in the way of our enjoyment of leisure itself so feeling enormous pressure to fill our downtime with the best choices is useless.
- D) Some people feel enormous pressure to fill their downtime with the best choices, but this pressure to maximise our fun might get in the way of our enjoyment of leisure itself.
- E) It might be that some people pressurize themselves to fill their downtime with the best choices, but they might have to sacrifice their enjoyment of leisure itself due to this pressure.

34. Öfkeyle işi bırakma, genellikle bir dizi işyeri probleminin sonucu olduğu için işverenler uyarı işaretlerine dikkat ederek güç bir zamanda terk edilmekten kaçınabilir.

- A) As rage quitting is generally the culmination of a series of workplace issues, employers can avoid being left in the lurch by paying attention to the warning signs.
- B) Rage quitting is generally the culmination of a series of workplace issues, so employers can avoid being left in the lurch by paying attention to the warning signs.
- C) Employers can avoid being left in the lurch by paying attention to the warning signs given by rage quitters who suddenly quit as a result of a series of workplace issues.
- D) When there is a series of workplace problems, employees quit suddenly in a rage attack, but employers can avoid this by paying attention to the warning signs.
- E) Employers who do not pay attention to warning signs are often left in the lurch by rage quitters who quit as a result of a series of workplace issues.

YDS MİNİ DENEME- İSMAİL TURASAN

Answer these questions according to the passage below.

Nearly a century ago, archaeologists working in France's Pyrenean foothills discovered a seashell in Marsoulas Cave. They identified the conch shell as a shared ceremonial drinking vessel and put it into storage at the Natural History Museum of Toulouse. Nine decades later, scholars revisited the cave artefacts and realized there had been a mistake. Rather than a cup, they had a prehistoric musical instrument around 12,000 to 18,000 years old. In 2019 Carole Fritz, an archaeologist with the French National Center for Scientific Research, conducted a review of objects found in the cave, famous for its prehistoric wall art created by a nomadic group of Upper Palaeolithic hunters in the Magdalenian epoch. Fritz's colleagues noted that the pointy end of the shell, or apex, was missing; they theorized that perhaps it was purposely broken off – a modification seen in conch horns from much later times. A CT scan of the shell's interior revealed a structure helpful to producing sound. Fritz also found a surprise: a hole made near the apex, where a mouthpiece could have been placed. To test the horn theory, a musician was able to play the shell and produce three tones, close in range to the notes C, C sharp, and D.

35. Which of the following can be inferred from the passage?

- A) France's Pyrenean foothills are the most important place for archaeology.
- B) The scholars revisiting the cave cut the pointy end of the shell on purpose.
- C) Marsoulas Cave is at a short distance to Toulouse.
- D) The use of conch shells as musical instruments has a long history.
- E) Upper Palaeolithic hunters were expert musicians.

YDS MİNİ DENEME- İSMAİL TURASAN

Nearly a century ago, archaeologists working in France's Pyrenean foothills discovered a seashell in Marsoulas Cave. They identified the conch shell as a shared ceremonial drinking vessel and put it into storage at the Natural History Museum of Toulouse. Nine decades later, scholars revisited the cave artefacts and realized there had been a mistake. Rather than a cup, they had a prehistoric musical instrument around 12,000 to 18,000 years old. In 2019 Carole Fritz, an archaeologist with the French National Center for Scientific Research, conducted a review of objects found in the cave, famous for its prehistoric wall art created by a nomadic group of Upper Palaeolithic hunters in the Magdalenian epoch. Fritz's colleagues noted that the pointy end of the shell, or apex, was missing; they theorized that perhaps it was purposely broken off – a modification seen in conch horns from much later times. A CT scan of the shell's interior revealed a structure helpful to producing sound. Fritz also found a surprise: a hole made near the apex, where a mouthpiece could have been placed. To test the horn theory, a musician was able to play the shell and produce three tones, close in range to the notes C, C sharp, and D.

36. Which of the following is true about the conch shell?

- A) It was correctly identified as a cup when it was first discovered.
- B) It was carved into its shape by scientists who reviewed it.
- C) It turned out that it didn't belong to the Magdalenian epoch.
- D) It took several CT scans to prove that it was made by a nomadic group of Upper Palaeolithic hunters.
- E) A musician helped prove that it served another purpose than it was initially thought.

YDS MİNİ DENEME- İSMAİL TURASAN

Nearly a century ago, archaeologists working in France's Pyrenean foothills discovered a seashell in Marsoulas Cave. They identified the conch shell as a shared ceremonial drinking vessel and put it into storage at the Natural History Museum of Toulouse. Nine decades later, scholars revisited the cave artefacts and realized there had been a mistake. Rather than a cup, they had a prehistoric musical instrument around 12,000 to 18,000 years old. - A) Archaeological Finds in Marsoulas Cave in France
- B) A Revision Reveals the True Nature of an Archaeological Find in France
- C) Famous Archaeological Mistakes in France History
- D) Carole Fritz: the Scholar Who Corrected an Important Mistake
- E) The Wall Art of Upper Palaeolithic Hunters in What is Now France

Answer these questions according to the passage below.

Desert-dwelling mammals have a range of adaptations to water scarcity. Some of these traits have to do with the functioning of the kidneys, which maintain the body's water and salt balance. Mammals vary in the size and shape of their kidneys and thus the extent to which they can concentrate urine and thereby conserve body water. The desert pocket mouse, for example, can live without water for months, in part because of the extreme extent to which its kidneys can concentrate urine. Humans can do this to a degree. When we lose copious amounts of water from sweating, a complex network of hormones and neural circuitry directs our kidneys to conserve water by concentrating urine. But our limited ability to do so means we cannot go without freshwater for nearly so long as the pocket mouse. Neither can we preload our bodies with water. The desert camel can drink and store enough water to draw on for weeks. But if humans drink too much fluid, our urine output quickly increases.

39. The underlined word "copious" in the passage is closest in meaning to ----.

- A) sparse
- B) enough
- C) abundant
- D) destructive
- E) luxuriant

Desert-dwelling mammals have a range of adaptations to water scarcity. Some of these traits have to do with the functioning of the kidneys, which maintain the body's water and salt balance. Mammals vary in the size and shape of their kidneys and thus the extent to which they can concentrate urine and thereby conserve body water. The desert pocket mouse, for example, can live without water for months, in part because of the extreme extent to which its kidneys can concentrate urine. Humans can do this to a degree. When we lose **copious** amounts of water from sweating, a complex network of hormones and neural circuitry directs our kidneys to conserve water by concentrating urine. But our limited ability to do so means we cannot go without freshwater for nearly so long as the pocket mouse. Neither can we preload our bodies with water. The desert camel can drink and store enough water to draw on for weeks. But if humans drink too much fluid, our urine output quickly increases.

40. It is clear from the passage that humans ----.

- A) are as capable as the pocket mouse when it comes to storing water
- B) could store water for weeks if they had humps like camels
- C) will definitely have kidney failure if they store water for a long time
- D) can hardly preserve water in their bodies for long periods
- E) did not evolve to drink lots of water during the day

YDS MİNİ DENEME- İSMAİL TURASAN

Desert-dwelling mammals have a range of adaptations to water scarcity. Some of these traits have to do with the functioning of the kidneys, which maintain the body's water and salt balance. Mammals vary in the size and shape of their kidneys and thus the extent to which they can concentrate urine and thereby conserve body water. The desert pocket mouse, for example, can live without water for months, in part because of the extreme extent to which its kidneys can concentrate urine. Humans can do this to a degree. When we lose **copious** amounts of water from sweating, a complex network of hormones and neural circuitry directs our kidneys to conserve water by concentrating urine. But our limited ability to do so means we cannot go without freshwater for nearly so long as the pocket mouse. Neither can we preload our bodies with water. The desert camel can drink and store enough water to draw on for weeks. But if humans drink too much fluid, our urine output quickly increases.

41. How much water different mammals can conserve depends on ----.

- A) how long they want to preserve it
- B) the size and shape of their kidneys
- C) how much they actually drink
- D) the way their kidneys work
- E) the concentration levels of urine

YDS MİNİ DENEME- İSMAİL TURASAN

Desert-dwelling mammals have a range of adaptations to water scarcity. Some of these traits have to do with the functioning of the kidneys, which maintain the body's water and salt balance. Mammals vary in the size and shape of their kidneys and thus the extent to which they can concentrate urine and thereby conserve body water. The desert pocket mouse, for example, can live without water for months, in part because of the extreme extent to which its kidneys can concentrate urine. Humans can do this to a degree. But our limited ability to do so means we cannot go without freshwater for nearly so long as the pocket mouse. Neither can we preload our bodies with water. The desert camel can drink and store enough water to draw on for weeks. But if humans drink too much fluid, our urine output quickly increases.

42. The passage is mainly about ----.

- A) the scarcity of water in deserts and its consequences for animals living there
- B) the extent to which some mammals can concentrate urine
- C) the importance of kidneys for the preservation of water in mammals' bodies
- D) the differences in the adaptability levels of desert-dwelling animals to water shortage
- E) why humans cannot store water as easily as some desert-dwelling animals like camels

For these questions, choose the best option to complete the dialogue.

43.

Chris:

- **You seem attached to your water bottle. Whenever I see you, you have it with you.**

Gilbert:

- **You bet I do. I drink 8 glasses every day; not less or more.**

Chris:

- -----

Gilbert:

- **Why do you say that?**

Chris:

- **Because how much you need to drink depends on your weight, your activity level, and the temperature.**

- A) What about soups you drink for lunch and dinner?
- B) You know what? This might be the most popular myth about hydration.
- C) I don't suppose it is filled with sports drink, is it?
- D) And it is from someone who drinks more than five cups of coffee.
- E) So you are not eating fresh fruits like watermelon or grapefruit.

44.

Myra:

- **You should stop eating ice-cream every day.
In fact, everyone should do away with it.**

Harry:

- ----

Myra:

- **I am serious. The dairy industry accounts for a massive 3.5 percent of the world's carbon dioxide emissions.**

Harry:

- **Then we should quit drinking milk altogether – or eating yoghurt for that matter.**

Myra:

- **Who knows? But we should definitely do something to decrease our carbon footprint.**

- A) You're kidding, right? Why should anyone do something like that?
- B) What bizarre science magazine have you been reading lately?
- C) I want my ice-cream lover best friend back. What got into you?
- D) Have you been able to quit eating ice-cream, anyway?
- E) Is this about the extra kilos I have gained in the last few weeks?

For these questions, choose the best rephrased form of the given sentence.

45. Even though Ivory Coast currently gets most of its power from fossil fuels, with natural gas generating 70% of its energy, the country has a target increasing usage of renewable energy sources to 42%.

- A) Natural gas currently generates 70% of the energy in Ivory coast, which currently gets most of its power from fossil fuels, thus, the country is set to increase its usage of renewable energy sources to 42%.
- B) Ivory Coast, which currently gets most of its power from fossil fuels, with natural gas generating 70% of its energy, has a target increasing usage of renewable energy sources to 42%.
- C) In spite of getting most of its power from fossil fuels, with natural gas generating 70% of its energy, Ivory Coast has recently started to increase its usage of renewable energy sources to 42%.
- D) Ivory Coast currently gets most of its power from fossil fuels, with natural gas generating 70% of its energy, yet it is expected to increase its usage of renewable energy sources to 42%.
- E) Most of the power in Ivory Coast is currently being obtained from fossil fuels, with natural gas generating 70% of its energy, but the country is aiming to increase usage of renewable energy sources to 42%.

46. Because tablaos, the typical venues of traditional flamenco dance, don't have a specific license that recognise them as cultural providers, they are unable to receive needed support from the Spanish government.

- A) The typical venues of traditional flamenco dance, tablaos lack a specific license that identify them as cultural providers, thus, they can't get the necessary backing from the Spanish government.
- B) With the tablaos, the typical venues of traditional flamenco dance, lacking a specific document that makes them places of cultural heritage, they are deprived of the much-needed support from the Spanish government.

- C) The Spanish government won't be able to support tablaos, the typical venues of traditional flamenco dance, because they don't have the necessary documentation that helps them become cultural providers.
- D) If tablaos, the typical venues of traditional flamenco dance, had a specific licence that recognise them as cultural providers, they would be able to get some support from the Spanish government.
- E) Tablaos cannot be recognised as cultural providers despite being the typical venues of traditional flamenco dance, so they are unable to receive needed support from the Spanish government.

For these questions, choose the best option to complete the missing part of the passage.

47. Although there are about 1.2 billion cattle in the world, only very few – on a few oceanic islands, and at Chillingham – live free of human interference or management. White as snow, with sinewy frames, a fierce temperament and vast horns that curve menacingly into jet-black tips, Chillingham wild cattle are no ordinary oxen retaining a primeval character. ----They are, indeed, far fewer in number than giant pandas, Siberian tigers or mountain gorillas.

- A) Chillingham Castle is home to one of the world's last remaining herds of wild cattle.
- B) They are also some of the rarest animals on the planet; currently numbering around 130.
- C) The Chillingham cattle were originally enclosed in the park around 800 years ago.
- D) The cattle's shadowlike form fits in perfectly against the backdrop of the castle.
- E) Their certain characteristics may have been frozen in time in the medieval era.

48. Public mourning rituals have a clear purpose. By gathering people together around the bereaved, they help mourners strengthen their bonds and re-enter the social world after a major loss. ---- They seem to serve no practical function. They seem almost pointless. Speaking of a widow who washed her husband's car each week, researchers point out, she didn't drive the car. There was no reason to wash the car. Yet you could see clearly how it's such an emotionally meaningful thing for her as rituals are used to create some order to regain control.

- A) Ritualistic practices can help to bring a degree of predictability to an uncertain future.
- B) Anxiety-reducing effect of rituals can apply to almost any high-pressure endeavour.
- C) Rituals come in many different forms
- D) But private rituals do no such thing.
- E) The type of ritual doesn't reduce anxiety.

76-80: For these questions, choose the irrelevant sentence in the passage.

49. (I) There are no substances or activities that universally or uniformly cause people to become addicted. (II) Many different theories of addiction exist because they weigh the role of contributing factors differently. (III) Some current models of addiction emphasize the causative role of individual variations in biology or genes that make a substance or experience feel more or less pleasurable. (IV) Many models of addiction highlight the causative role of individual psychological factors, whether personality factors such as impulsiveness or sensation-seeking, or psychopathology such as the negative effects of early trauma. (V) Other models of addiction emphasize the role that social and economic factors play in shaping behaviour, such as the strength of family and peer relationships and the presence of absence of educational and employment opportunities.

A) I B) II C) III D) IV E) V

50. (I) China is a geographically diverse and complex country. (II) With the highest and one of the lowest places on Earth, its relief varies from nearly impenetrable mountainous terrain to vast coastal lowlands. (III) Its climate ranges from extremely dry in the northwest to tropical monsoon in the southeast. (IV) It is home to the world's widest array of plant species. (V) Indeed, practically all types of Northern Hemisphere plants, except those of the polar tundra and some of the world's most exotic animals are found in China.

A) I B) II C) III D) IV E) V
