

Baęlaęlar Set 1

1. **Scientists warn that climate change will continue to accelerate ----- global carbon emissions are significantly reduced through international cooperation and sustainable energy policies.**
- A) unless
B) as if
C) whereas
D) so that
E) now that

2. ----- **technological advancements in medicine have led to higher life expectancy, some diseases remain difficult to treat due to antibiotic resistance and genetic mutations.**
- A) Whereas
- B) Because
- C) Although
- D) As long as
- E) In order that

3. **The demand for renewable energy sources is increasing rapidly ----- concerns about fossil fuel depletion and environmental sustainability continue to grow.**
- A) unless
- B) because
- C) so that
- D) as though
- E) while

4. ----- digital communication has made global interactions easier, it has also raised concerns about data privacy and cybersecurity threats.
- A) So that
- B) Unless
- C) While
- D) When
- E) Because

5. ----- **advancements in artificial intelligence continue at the current pace, many tasks traditionally performed by humans are expected to be fully automated within the next few decades.**
- A) Unless
- B) If
- C) Even though
- D) Since
- E) When

6. ----- the invention of the printing press, the widespread distribution of books and literacy rates increased dramatically across Europe.
- A) In case of
- B) In the wake of
- C) As opposed to
- D) For the sake of
- E) In the hopes of

7. **Researchers are naturally exploring alternative energy sources such as nuclear fusion, ----- it could provide an unlimited supply of clean energy.**
- A) whereas
- B) in case
- C) now that
- D) so that
- E) unless

8. ----- microplastics have been detected in marine life and even human blood, their long-term effects on health remain largely unknown.
- A) Since
- B) Although
- C) Unless
- D) Once
- E) Just as

Adverbial Clauses / Zarf cümlecikleri

Connectors / Baęlaęlar Set 2

1. **Many experts argue that artificial intelligence will transform industries in the coming decades, ----- the internet revolutionized communication, business, and education by making information more accessible and automating numerous tasks.**
- A) whereas
- B) in case
- C) just as
- D) although
- E) so that

2. **Scientists are working on developing more effective vaccines ----- new variants of viruses emerge, ensuring that global health systems remain prepared to prevent future outbreaks from escalating into major pandemics.**
- A) in that
- B) just as
- C) whereas
- D) in case
- E) so that

3. **Governments must invest in public transportation infrastructure ----- major cities can reduce traffic congestion, lower air pollution levels, and improve the overall quality of life for urban populations.**
- A) so that
- B) in case
- C) unless
- D) although
- E) because

4. **The researcher's findings were highly significant ----- they provided the first concrete evidence linking air pollution exposure to long-term cognitive decline in older adults.**

A) in case

B) so that

C) just as

D) unless

E) in that

5. ----- the increasing demand for clean energy, many countries are accelerating their transition to renewable sources such as solar and wind power to reduce dependence on fossil fuels.
- A) Just like
B) But for
C) Due to
D) Despite
E) As in

6. **The astronaut experienced extreme disorientation upon returning to Earth's gravity, feeling ----- his body had forgotten how to move properly after months of weightlessness in space.**
- A) in case
B) as for
C) as if
D) so that
E) whereas

7. ----- electric cars do not produce carbon emissions while driving, their environmental impact still depends on how the electricity used to charge them is generated.
- A) Unless
- B) Although
- C) Because
- D) So that
- E) Just as

8. **The new safety measures were implemented in public buildings ----- an earthquake occurs, ensuring that occupants have clear evacuation routes and access to emergency supplies in case of structural damage.**
- A) even if
B) in case
C) so that
D) although
E) just as

9. ----- global temperatures continue to rise, many low-lying coastal cities could face severe flooding due to rising sea levels, forcing millions of residents to relocate inland or to higher ground.
- A) While
- B) If only
- C) When
- D) As
- E) Because

10. **Advancements in artificial intelligence and machine learning will likely revolutionize healthcare, ----- new diagnostic tools are being developed to detect diseases earlier and improve patient outcomes with personalized treatment plans.**

- A) just as
- B) in case
- C) although
- D) whereas
- E) unless

11. ----- an asteroid impact is unlikely to happen in the near future, space agencies continue to develop defense strategies to prevent potential catastrophic collisions.

- A) Since
- B) In order that
- C) Even though
- D) Provided
- E) Just as

12. **Economic growth is often prioritized in policy-making, ----- environmental concerns should also be considered to ensure sustainable development for future generations.**

- A) similarly
- B) however
- C) conversely
- D) therefore
- E) otherwise
