43 - 46: Answer these questions according to the passage below.

Braggarts are obnoxious—and to avoid looking like one, people often refrain from sharing their successes with those around them. But recent research suggests that hiding one's wins may come with significant social costs. In the first of eight studies, 82 percent of participants reported hiding a success from a loved one, coworker, or stranger, often out of a desire to avoid bragging. But how did others feel when someone hid a success from them? In subsequent studies, people tended to feel more insulted and patronized by someone who, they learned, had withheld an achievement-such as a college acceptancecompared with someone who shared it. And secrecy came with relational consequences: Those who had a success hidden from them, rather than shared, felt less close to the secret-keepers and were less inclined to trust or collaborate with them. Hiders feared that sharing would trigger envy; they weren't wrong. Targets who were directly told of someone's success felt more envious than those who had it hidden from them but found out another way. A second paper suggests that this too may be costly. Even when in-lab experiments were specifically designed so that admitting failure was objectively more helpful to other participants than sharing success, they were still less likely to confess to slip-ups. However, deliberately highlighting the lessons that can be extracted from failure by both oneself and others—like information on how to win a game, for example—made participants more willing to share.

43. We learn from the text that participants hiding a success from others like a loved one ----.

- A) refrain from sharing their successes particularly with those around them
- B) are still less likely to confess to slip-ups
- C) try to avoid boasting about their wins
- D) feel less close to the secret-keepers
- E) believe that sharing would prevent envy

44. According to the passage, when those who had a success hidden from them learn about it, they---.

- A) chose to move away from all people around them
- B) were unwilling to cooperate with hiders
- C) were less inclined to gain others' trust
- D) forgot the fact that they do the same
- E) envied the hiders more than when they learn at once

45. In-lab experiments, participants agreed to share more only when ---.

- A) there were lessons to be learnt for themselves and others
- B) admitting failure was more helpful to other participants
- C) targets who were directly told of someone's success felt more envious
- D) they tended to feel more insulted and patronized
- E) they needed more information on how to win a game

46. What is the passage mainly about?

- A) Hiding one's wins and its significant social costs
- B) How others feel when someone hides a success from them
- C) Experiments specifically designed for people to admit failure
- D) Possible social consequences of hiding wins and people's stance to admitting failure
- E) The conflict between hiding wins and a desire to avoid bragging

47- 50: Answer these questions according to the passage below.

Maintenance rehearsal is a type of memory rehearsal that is useful in maintaining information in short term memory or working memory. Because this usually involves repeating information without thinking about its meaning or connecting it to other information, the information is not usually transferred to long term memory. An example of maintenance rehearsal would be repeating a phone number mentally, or aloud until the number is entered into the phone to make the call. The number is held in working memory long enough to make the call, but never transferred to long term memory. An hour, or even five minutes after the call, the phone number will no longer be remembered. In 1972, Craik and Lockhart proposed that memory recall involves multiple processes operating at different levels. Maintenance rehearsal involves repeatedly processing an item at the same level, which requires little attention. It has the potential for immediate recall, but has little effect in recall in long term memory. Depending on the information that needs to be processed determines which route of recall an individual will use. For example, if the information only needs to be used temporarily, a person will use maintenance rehearsal in working memory. But, if the information needs to be used at a later date, most likely a person will use elaborative rehearsal.

47. It can be understood from the passage that in maintenance rehearsal, ----.

- A) the process involves repeating information with a focus on its meaning
- B) the information is not generally transferred to long term memory
- C) processing an item which necessitates much attention is not that straightforward
- D) repeating a phone number mentally, or aloud is not effective
- E) five minutes after the call, the phone number is still remembered

48. The writer gives the example of telephone call in order to ----.

- A) help us understand the true meaning of the maintenance rehearsal and its importance
- explain how a type of memory rehearsal can be useful in maintaining information in long term memory
- attract our interest to how our brains respond to the complexity of even seemingly unimportant tasks in our daily lives
- emphasize the point she or he has made about the retaining data in the memory for a short while
- E) make a point about the multiple processes operating at different levels

49. Which of the following <u>cannot</u> be an example of maintenance rehearsal according to the passage?

- A) Repeating a phone number mentally
- B) Repeating the shopping list aloud
- C) Repeating the web-address of a company
- D) Repeating the lyrics of a song we will sing
- E) Repeating the plate number of a vehicle we see hitting another car in an accident

50. Which of the following could be the best title for the passage?

- A) Repeating Information Without Thinking About its Meaning
- B) Multiple Processes Operating at Different Levels
- C) Maintenance Rehearsal for Short-term Memory
- D) Craik and Lockhart's Study on Memory Recall
- E) How Elaborative Rehearsal Differs from Maintenance Rehearsal
