17. - 21. Choose the best option to complete sentences.

The Silk Road is the name of the trade routes connecting Europe and the Mediterranean with Asia. The route was over 6,500 km and got its name because the early Chinese traded silk along it. Silk was valuable as it is now. (17) ---- it was the main trading item for quite a long time, there were some other goods travelling along the Silk Road. Throughout history, a wide variety of goods of Chinese origin found their way moved (18) ---- continents thanks to this road, appealing to many diverse cultures and tastes. The ancient Romans were the first people (19) ---- the value of silk as a commercial product with a delicate texture and shiny look. Indians followed suit and traded silk with the Chinese (20) ---- gold and other precious materials. Travelling along the route was dangerous, though, due to the hot desert, high mountains and sandstorms. Caravans carried most of the goods. Over the centuries, people (21) ---- along the ancient route and many towns, ports and cities emerged. Later on, there were fewer hardships people had to overcome, but by no means was it easy.

78. (I) As the twentieth century began, the importance of formal education in the United States was understood better and being well-educated was considered merit. (II) The economic line of life became industrialised and bureaucratized, and this caused people to look for jobs in the city. (III) Just as more expertise meant better positions in the workplace and the social ladder, better education paved the way for a bright career. (IV) Therefore, as traditional farming practices had disappeared, even Americans still living in towns with limited means to get educated were looking for ways to get out of their vicious circle through education. (V) Indeed, schooling and receiving formal education increasingly came to be seen as an important, if not the only, way for economic and social mobility.
