

## CÜMLE ÇEVİRİLERİ

1. **Scientists** have conducted years of **research** to create vaccines **that protect people from dangerous diseases**.
2. Exercising **regularly** not only improves your **health**, but it also helps you stay **strong**.
3. In the past, people used to **spend** most of their day working in fields, which required great **strength**.
4. Vaccines are one of the most **important** discoveries **that have saved millions of lives worldwide**.
5. Urbanization is causing cities to become more **crowded**, which **affects** the quality of life.
6. Over the years, engineers have **built** machines **that are improving human productivity**.
7. Diseases such as diabetes and heart conditions **can be prevented by adopting healthy habits**.
8. Robots will soon **take over** repetitive **tasks**, allowing people to focus on more creative work.
9. The pace of technological development is so **fast** that people need to **adapt** quickly to keep up.
10. Scientists **believe** that artificial intelligence **will create solutions to problems we cannot solve today**.
11. **Housework**, such as cleaning and cooking, can now be done by robots, making life more **comfortable** for families.
12. The elderly often need someone to **take care of them**, especially when they live alone.
13. People should **exercise** regularly to **improve** their mental and physical well-being.

14. Cities are **becoming** more crowded because many people **move** to urban areas for work.
15. Scientists are working to **discover** how climate change **affects** human health.
16. In the future, cars that **appear** to drive themselves will become part of our daily lives.
17. Artists often **spend** hours in their studios **creating** unique works of art that inspire others.
18. **Daily** exercise helps people stay fit and build **strength** over time.
19. Over the centuries, humanity has **adapted** to various environmental challenges and **improved** its living conditions.
20. Machines **which perform tasks at a faster pace** are revolutionizing industries globally.
