

South Africa is the southernmost country in Africa. About 80% of South Africans are of Black African ancestry, divided among a variety of ethnic groups speaking different African languages. The remaining population consists of Africa's largest communities of European, Asian and Multiracial ancestry. It is a multiethnic society encompassing a wide variety of cultures, languages, and religions. Its pluralistic makeup is reflected (36) ---- the constitution's recognition of 11 official languages, The country is one of the few in Africa with no a coup d'état, and regular elections (37)---- for almost a century. During the 20th century, the black majority sought to claim more rights from the dominant white minority, which played a large role in the country's recent history and politics. The National Party imposed apartheid in 1948, (38) ---- institutionalising previous racial segregation. After a long and sometimes (39) ---- struggle by the African National Congress and other anti-apartheid activists both inside and outside the country, the repeal of discriminatory laws began in the mid-1980s. South Africa also has the most UNESCO World Heritage Sites in Africa. (40) ---- , climate change is an important issue for South Africa: it is a major contributor to climate change as the 14th largest emitter of greenhouse gases as of 2020 and is vulnerable to many of its impacts, its water-insecure environment and vulnerable communities.

Pangolin, also called scaly anteater, are one of the eight species of armoured mammals. (17) ---- all eight species, adult tail length ranges from about 26 to 70 cm. (18) ---- the sides of the face and underside of the body, where there are no hairs, these animals are all covered with brownish scales composed of hairs. Some pangolins, such as the African black-bellied pangolin live in trees, (19) ---- others, such as the giant ground pangolin of Africa, are terrestrial. Pangolins (20) ---- termites but also eat ants and other insects. In most species, only one offspring is born at a time. Their life span in the wild is unknown; however, some captive animals are known (21) ---- the age of 20.
