

4.

1-6 : For these questions, choose the best word(s) or expression(s) to fill the space(s).

Hundreds of small new technologies and technological refinements occurred in the 800 years of the Hellenistic and Greco-Roman periods, but overall the technological bases of production did not change ---- during the period.

- (A) notoriously
- (B) fundamentally
- (C) coincidentally
- (D) erroneously
- (E) covertly

13.

7-16 : For these questions, choose the best word(s) or expression(s) to fill the space(s).

In the 1990s, the papaya ringspot virus wiped out papaya plantations in Hawaii; ----, a variety of genetically-modified papaya, called rainbow papaya, was developed to be resistant to the virus and help the plantations thrive once again.

- (A) that is
- (B) hence
- (C) for example
- (D) in fact
- (E) similarly

33.

27-36 : For these questions, choose the best option to complete the given sentence.

Physical training can be beneficial for mental problems, including depression and anxiety, ----.

- (A) whereas some studies show that daily physical training can relieve the symptoms of certain mental problems
- (B) so those who suffer from depression may associate physical training with fatigue, muscle soreness, and boredom
- (C) although lifestyle changes through physical training together with stress reduction techniques can help people combat their mental problems
- (D) yet overtraining might have negative effects on your mood, as focusing too intently on the results of training does
- (E) because it might be very difficult to convince depressed individuals of psychological benefits of training

Önceki soru

63-67 : For these questions, choose the best option to complete the dialogue.

Meredith:

- Since I missed the class yesterday, can you fill me in on the homework assignment? I haven't had a chance to check it.

Sandra:

- Sure, the professor wants us to write a 500-word paper on a lost ancient civilisation and why we believe it had the biggest impact on history.

Meredith:

- Oh, then I'll definitely write about the Assyrians as they had the largest empire and survived for the longest period of time.

Sandra:

Meredith:

- True, but I'm sticking to what I've said. The Assyrians had the ability to harness an extensive and populous empire, and their army was 200,000 at its strongest.

- (A) Well, I was thinking about the Phoenicians. I mean, where would Mediterranean trade have been without them? You've chosen a good one to write about, though.
- (B) Good choice, but don't discount the Minoans. They had the potential to become the greatest civilisation despite surviving two natural disasters.
- (C) Yeah, the Assyrian Empire is at the top or near the top of the list. It's pretty amazing to think that the walls surrounding its capital city were 15 metres thick.
- (D) I thought about the Tiwanaku since they left the least amount of clues to their history and vanished under mysterious circumstances, but I'm also considering the Assyrians.
- (E) I believe every civilisation has its own merits and drawbacks. Still, the Assyrians may have had greater achievements compared to other civilisations of its age like establishing the first-ever university.

68.

68-71 : For these questions, choose the best rephrased form of the given sentence.

Because cat-scratch disease is usually not a life-threatening illness and people tend to form strong emotional bonds with their cats, doctors do not recommend getting rid of a cat suspected of carrying the disease.

- (A) As cat-scratch disease is typically not fatal and people generally develop profound emotional attachments to their cats, doctors do not advise people to abandon a cat that is thought to have the disease.
- (B) While cat-scratch disease is seldom severe and people often have deep emotional connections with their cats, doctors do not suggest continuing to keep a cat if their owners doubt that the cat has contracted the disease.
- (C) Although cat-scratch disease is not often deadly and people usually build close emotional bonds with their cats, people tend to keep a cat away from themselves when they realise that the cat has the disease, contrary to what doctors suggest.
- (D) Cat-scratch disease does not have a significant health risk and people generally develop strong emotional ties to their cats; however, doctors do not recommend people to keep a cat if they suspect that the cat has been afflicted by the disease.
- (E) Because cat-scratch disease generally poses no serious threat and people are likely to have close emotional ties to their cats, doctors do not advise people to abandon a cat unless it is confirmed to be a carrier.

75.

72-75 : For these questions, choose the best option to complete the missing part of the passage.

In terms of human ecology, identity statuses play a key role in how adolescents cope and adapt within different environmental contexts. ---- They are required to formulate a sense of who they think they are, what they plan to accomplish, and who they hope to become in the future. According to Erik Erikson, a leading life span developmental theorist, the task of forming a coherent and stable sense of identity is one of the major challenges that adolescents must resolve if they are going to become reasonably effective adults who can responsibly govern their own lives.

- (A) The search for identity may include observing and talking to role models, discussing beliefs with others, travelling, and the like.
- (B) The rapid biological, social, cognitive, and emotional changes that accompany puberty create a need for adolescents to reconsider how they define themselves.
- (C) Although improvements in metacognitive abilities provide advantages, a negative by-product of these advances is the tendency for adolescents to develop a sort of egocentrism.
- (D) Many parents wonder about the susceptibility of adolescents to peer pressure in the course of identity formation.
- (E) However, devising a complex and abstract self-characterisation may have a great impact on their academic success.
