2024 KASIM YDS KELİME LİSTESİ

Hinder – obstruct, delay – engellemek… - impede – hamper – block

Cope with – deal with, manage, address, tackle, handle – ele almak

Significantly –considerably, markedly, remarkably – ciddi şekilde

Contrary to – opposite of, in contrast to - -nın aksine

Ultimately – finally, eventually, in turn – sonunda, nihayetinde

Ultimate power: son güç, nihai güç

Erroneously – incorrectly, mistakenly – hatalı bir şekilde

Erroneous – hatalı… (adj)

Whereas – while – ken

Whereas: taban tabana zıtlık…

Whereas özne 1 … konu 1, özne 2… konu 2

*** although – whereas

While: whereas (1)

While: ken – as – zaman bağlacı (Ving)

While: e rağmen: although, though, even though, much as

As if – as though – mış gibi…

Look-seem-appear-behave-treat-act-describe as if…

To pledge allegiance to – express loyalty, swear loyalty

Sadakat ifade etmek,… bağlılık göstermek/bildirmek

In addition to – also, _as well as,_ besides, apart from, aside from, together with

Nın yanısıra…

Given that – considering, because – göz önüne alındığında…

When I study, I get good grades _because_ (given that) I have more knowledge about the subject..

Seasonal temperature changes – related to seasons

Mevsimsel ısı değişiklikleri

Alternately increase or decrease – fluctuate, vary – değişken olarak artış ya da azalış

Fluctuate… vary… ---- among… /// from…

Biomass – organic material, biological fuel source

Nanotechnology – manipulation of matter on a small scale

Enzyme – protein catalyst, biological molecule

Mediation – negotiation, intervention

Settlement – agreement, resolution

Intransigent – stubborn, unyielding

Persuasion – convincing, influencing

Compliance – obedience, adherence

Cognitive profile – mental characteristics, intellectual abilities

Exceptional working memory – extraordinary short-term memory, enhanced recall ability

Far-reaching applications – wide-ranging uses, extensive implications

Industrial activities – manufacturing processes, factory operations

Traffic emissions – vehicle pollutants, exhaust gases

Air quality – pollution level, atmospheric condition

Pollutants – contaminants, harmful substances

Immune system – body defense system, disease resistance mechanism

Memory impairment – loss of memory, cognitive decline

Necessary precautions – essential measures, preventive actions

Environmentalists – conservationists, ecologists

Health campaign – wellness initiative, medical drive

Biodegrade – decompose naturally, break down

Biotech company – biotechnology firm, genetic research organization

Caterpillars – insect larvae, butterfly larvae

Plastic decomposition – breakdown of plastic, disintegration of plastic

Single enzyme – one biological catalyst, solitary protein

Forensic evidence – crime-scene proof, investigatory data

Reliability – dependability, consistency

Validity – accuracy, legitimacy

Three-dimensional fingerprints – 3D impressions, raised fingerprint patterns

Scrutiny – examination, inspection

Proficiency testing – skill evaluation, capability assessment

Inadequate interpretations – insufficient analysis, incorrect explanations

Social influence – peer pressure, societal impact

Attitudes – opinions, beliefs

Beliefs – convictions, faiths

Altering behavior – changing actions, modifying conduct

Natural decomposition – organic breakdown, decay

Crop residues – leftover plant materials, agricultural waste

Environmental concerns – ecological worries, sustainability issues

Renewable energy – sustainable power, green energy

Carbon emissions – greenhouse gases, CO2 output

Nuclear power – atomic energy, nuclear energy production

Collaborative projects – group tasks, joint ventures

Responsibility – duty, obligation

Academic motivation – educational drive, scholarly inspiration

Achievable goals – realistic targets, attainable objectives

Plant materials – botanical substances, organic matter

Biofuel production – creating fuel from organic matter, renewable fuel creation

Fossil fuels – non-renewable energy sources, coal and oil

Tropical countries – equatorial nations, warm-climate regions

Rising consumption – increasing use, growing demand

Anxiety disorders – mental health conditions, nervous system issues

Prevalence – commonness, widespread occurrence

Treatment options – medical solutions, healthcare methods

Marine organisms – sea creatures, aquatic lifeforms

Alternating effect – fluctuating impact, variable influence

Ocean waters – seawater, marine environment

Plastic decomposition – breaking down of plastic, material degradation

Industrial activities – manufacturing processes, industrial operations

Traffic emissions – vehicle pollutants, traffic-related gases

Immune system – bodily defense mechanism, disease resistance

Memory impairment – cognitive decline, forgetfulness

Necessary precautions – essential measures, safety actions

Health campaign – wellness initiative, public health effort

Single enzyme – solitary biological catalyst, unique protein

Environmentalists – ecologists, conservation advocates

Collaborative projects – joint efforts, teamwork tasks

Persuasion – convincing others, influencing decisions

Compliance – adherence to rules, obedience

Proficiency testing – skill assessment, performance evaluation

Reliability – dependability, trustworthiness

Validity – accuracy, correctness

Scrutiny – close examination, detailed review

Far-reaching applications – extensive uses, broad implications

Exceptional working memory – enhanced recall ability, strong memory skills

Cognitive profile – mental capabilities, intellectual characteristics

Intransigent – stubborn, uncooperative

Settlement – resolution, agreement

Mediation – arbitration, conflict resolution

Greenhouse gas emissions – atmospheric pollutants, CO2 release

Seasonal temperature changes – weather fluctuations, seasonal variations

Alternately increase or decrease – fluctuate, oscillate

Given that – considering, because

In addition to – along with, as well as

To pledge allegiance to – express loyalty, commit to

As if – as though, hypothetically

Whereas – while, contrastingly
