79. (I) Dinosaurs were the dominant species for nearly 165 million years, during a period known as the Mesozoic Era. (II) Growing evidence suggests that many dinosaurs were warm-blooded, bore colourful feathers, and engaged in behaviors similar to those of contemporary birds. (III) Their reign concluded at the end of the Cretaceous Period, when an asteroid the size of a mountain slammed into Mexico's Yucatán Peninsula with the force of 100 trillion tons of TNT. (IV) The impact created a crater 115 miles across and several miles deep and sent tons of rock, dust, and debris into the atmosphere. (V) A darkness descended across the planet that, along with other related catastrophes, wiped out an estimated 80 percent of life on Earth.

80. (I) Among the most annoying of bugs that irritate us during summer are mosquitoes, whose bites can cause itching for days. (II) The thing is: their nuisance doesn't end when they bite us and take our blood. (III) The best way to avoid the itching is to avoid mosquitoes in the first place. (IV) Their bite leaves us with a nasty each that even disturbs our sleep. (V) In fact, people with allergic sensitivity can suffer for days, even weeks, from a mosquito bite.
